

FACULTY RESOURCES

From tracking students' CALI lesson scores to blogging to providing free and open casebooks, CALI's services help you embrace technology and improve your teaching.

CALI Lessons are 850+ interactive web tutorials that cover 33 legal subject areas. Lessons are written and edited by law school professors and librarians at member schools. We're always looking for new authors. See cali.org/lessons.

LessonLink creates a unique URL that tracks your students' lesson usage, down to individual answers to questions. At cali.org/lessonlink.

CALI Author and AutoPublish let you edit our lessons, or even create your own originals. Build or edit lessons with CALI Author, then publish it just for your students with the AutoPublish feature within CALI Author. Download CALI Author free at cali.org/calauthor.

eLangdell[®] is our electronic casebook press. With iPads, Kindles, iPhones and other gadgets, the future of casebooks is digital. Our goal is to lead legal education into an era of *open* electronic casebooks.

To us, open means you can rearrange and remix eLangdell casebooks to your way of teaching. It means you and your students can adopt eLangdell casebooks for free under a Creative Commons license. We're looking for faculty who want to pioneer electronic casebooks with us. Visit cali.org/elangdell.

Classcaster[®] is a course blogging system that provides law school faculty, librarians, and staff with another way to interact with students and communities. Classcaster offers free space and tools for posting not only traditional blog articles, but also podcasts and all types of documents and files. Currently it is home for 50 faculty course blogs with over 150 course podcasts. Start blogging now at classcaster.net.

CALI Excellence for the Future Award® program recognizes high performing law students. The award is given to the student with the highest grade in a class, as determined by the professor or registrar. Awardees receive a printed certificate and a permanent URL VirtualAward that they can link to from their online resumés or biographies. Over 100 law schools participate in the CALI Excellence for the Future Award program. You can too at cali.org/excellenceawards.

MediaNotes does for video what the red pen does for papers. It's a software that lets you give feedback through tagging and commenting on videos. Use it for negotiations, interviews, mock trials, and other practical skill student performances. See cali.org/medianotes.

InstaPoll is a virtual clicker: a web-based application that lets you instantly poll students in the classroom using nothing more than the laptop they already have. Students need to have laptops, be connected to the Internet, and have a web browser with the latest Flash plugin. cali.org/instapoll.

CALI Conference for Law School Computing® is where law school IT professionals, librarians, and faculty meet to discuss ideas and innovations and technology. We host the CALI Conference annually at a member law school. Faculty at member schools can attend at a discount. Visit conference.cali.org for more information on past and upcoming conferences.

Legal Education Commons (LEC) is a community collection of legal education materials that you can incorporate into your teaching. A Creative Commons license attached to all LEC materials lets you use, share, and remix LEC content however you like for educational purposes. The LEC is only as good as the content you share. Upload your content today at cali.org/lec.
