

# TDLP MOOC

## WHAT IS IT?

Topics in Digital Law Practice (TDLP) was a Massive Open Online Course (MOOC) offered by CALI® in the Spring of 2012. It was designed to provide an overview of the changes that are occurring in the practice of law today, especially with respect to technology. It introduced law students to real-world situations and technologies that they will encounter in the job market and pointed law professors to new avenues to cover in their courses.

The course ran for 9 weeks and featured the crème de la crème of legal thought leaders and innovators as instructors. Each topic had a thirty minute presentation, Q&A session and interactive assignment. CALI has recorded and archived these materials and they are available under a Creative Commons license. Law faculty are encouraged to view and use these videos in their current course offerings. Available at <http://tdlp.classcaster.net/>
